Vacation internship at EDBC 2022/2023
Data Science & Data Cleansing

EDBC
Evolution Data Business Consulting

To strengthen the Data Science team, Evolution Data GmbH is advertising the following internship positions for the team in Sakarya:

Internship in Data Science & Data Management
Areas of responsibility:

- Technical Research
  - Obtaining information from data sheets and the web on specific products from: Automation, Electrical Engineering & IT for Production and Logistics.

- Data preparation with the help of automatisms for example in Python, Java or other languages (and in pragmatic cases in Excel)
  - Clustering of product and commodity groups. Classification and evaluation of these products and product groups.

- For these activities, previous knowledge in the fields of mechanical engineering, automation or electronics is required, although a small training session will also be held on our part.

- However, motivation to learn new areas quickly and an interest in automation technology and electrical engineering are mandatory.

Duration of the internship: up to 3 months
Subsequent full-time or part-time employment is possible provided a good evaluation is received.

Our winter internships are awarded in the winter months of December 2022, January and February 2023 for a duration of 1 to 3 months. For this internship (25 hours per week) you can expect a monthly gross salary from 4.000,00 TL.

If you are interested in an internship, send us your application to career@edbc.eu
