Vacation internship at EDBC 2022
Website Creation & Front-End Development

EDBC
Evolution Data Business Consulting

To strengthen the Data Science team, Evolution Data GmbH is advertising the following internship positions for the team in Sakarya:

Internship in Website Creation & Front-End Development
Areas of responsibility:

- Development of front-end functions of a website for data preparation
  - Clean presentation of information from data sheets and the Internet for specific products from the areas: Automation, electrical engineering & IT for production and logistics.

- UI/UX development for end users
  - Design, development and optimization of usability of end user focused websites

- For these activities, previous knowledge in the fields of web design, React development and database management is required, although a small training session will also be held on our part.

- However, motivation to learn new areas quickly, interest in beautiful websites and e-commerce solutions are mandatory.

Duration of the internship: up to 3 months
Subsequent full-time or part-time employment is possible provided a good evaluation is received.

Our summer internships are awarded in the summer months of August, September and October 2022 for a duration of 1 to 3 months. For this internship (25 hours per week) you can expect a monthly gross salary from 3.500,00 TL.

If you are interested in an internship, send us your application to celalceken@sakarya.edu.tr or jobs@edbc.eu
